**OF SHABUHM SHABUHM**

Legends foretell a time of strife,  
when Shabuhm Shabuhm, guardian of  
the gates of vile darkness, shall  
fall from his place of power. All  
hope for the island will  
rest with a wanderer, a  
reluctant hero caught  
up in the end of the  
world, poised to  
save it, or to  
condemn it for  
all time...

## THE NAME'S MALLARD. MAUI MALLARD.

I arrived here a washed up shell of the duck I used to be. And I liked it just fine. I'd played the game, now I'd cashed in my chips and bought a one-way ticket to oblivion. It was time to crawl into a coconut shell and hide beneath a paper umbrella. Yes, oblivion was my kind of place. But SHE walked in the door and changed my life. Brother, she had gams up to her neck...

But enough about her. Let's talk about you. What do YOU think of her? No wait, let's talk about this journal

you're holding in  
your hot little  
hands. On its pages  
you'll find my notes  
on File 35: The Case  
of the Missing Mojo.  
Believe me,  
everything I've  
written here is as  
true as the sky is  
blue, the grass is green  
and her hair that  
carried the soft  
scent of fresh  
wildflowers...  
oh, sorry.

So as I prepare to board a ship that will  
take me away from the nightmare that has  
been my life, I take one last look  
through this chicken scratch (er, make  
that MALLARD scratch), and recall the  
frosty and ferocious foes I had to battle.  
From the vicious MudDrakes and their  
giant Frog God to the Witch Doctor and  
his powerful mojo spells, I can't help  
thinking that for a guy with a death  
wish like me, this place was a dream come  
true. Maybe I'll stick around for a while  
after all...

## GETTING AROUND

Shabuhm Shabuhm's a nice fellow, one you'd like to take home for dinner. He helped me out by giving me a few mojo tools, and I'm giving them to you. Here's a couple of my drawings to help explain them.

## HEALTH METER

When this meter gets to zero, it's game over. The end of the road. Time for the big sleep.

## MAUI'S NINJA METER

The numbers on this meter helped me keep track of my Maui health. When I collected Yin-Yang coins, I started building my ninja strength, and the picture of my head flashed between Maui and Ninja Maui. When I had collected enough, I was able to switch between Ninja Maui and Regular Maui as I needed to (see ***Control Yourself, Dollface*** to learn how to switch).

The more ninja power I have, the more powerful my attacks. Even my belt color changes to show how strong I am!

To boost your health, drink plenty of tropical punch. There's more about this special stuff under **Loot**.

## CONTROL YOURSELF, DOLFFACE

You can change the control pad configuration (in other words, which actions are assigned to which button) at the Options screen. You can access the Options screen by choosing **OPTIONS** at the beginning of each new game.

## AS REGULAR MAUI:

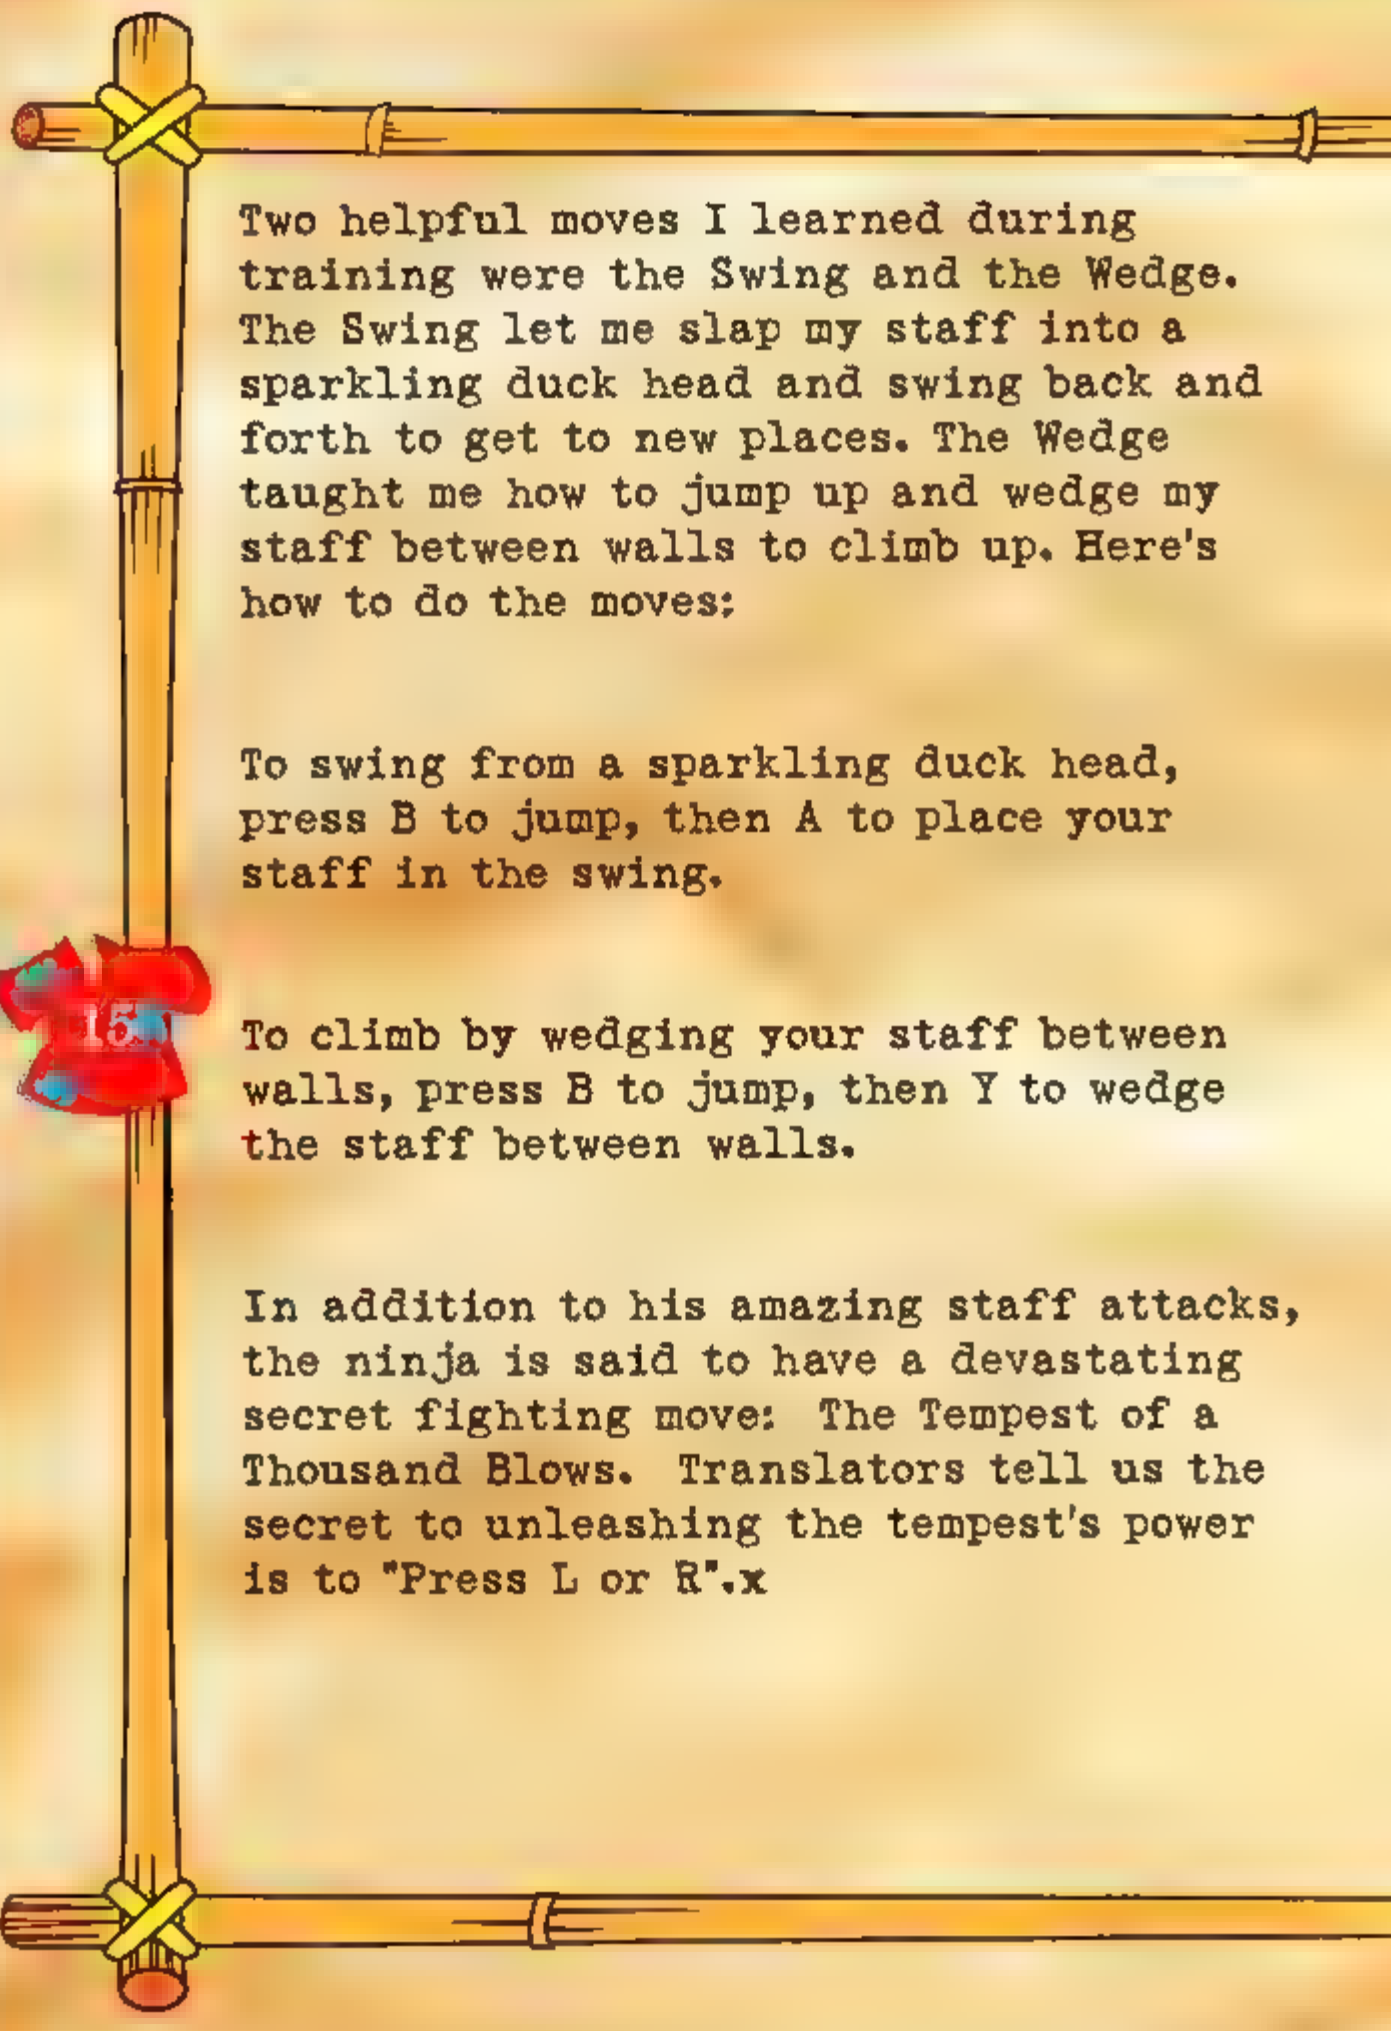

## ON BEING A NINJA

Detectives are sometimes like great chefs -- we have to mix it up a little. But while cooks whip up soufflé s, we have criminal cupcakes to contend with -- like ninja clones, for example. I trained to be a ninja long before I was a detective. It helped me during Case 14: The Search for Sue Schee, just like it helped me on this case. If you don't know much about being a ninja, take a gander at my scrawl below -- it should help.

## AS NINJA MAUI:

Two helpful moves I learned during training were the Swing and the Wedge. The Swing let me slap my staff into a sparkling duck head and swing back and forth to get to new places. The Wedge taught me how to jump up and wedge my staff between walls to climb up. Here's how to do the moves;

To swing from a sparkling duck head, press B to jump, then A to place your staff in the swing.

15

To climb by wedging your staff between walls, press B to jump, then Y to wedge the staff between walls.

In addition to his amazing staff attacks, the ninja is said to have a devastating secret fighting move: The Tempest of a Thousand Blows. Translators tell us the secret to unleashing the tempest's power is to "Press L or R".x

We will know the wandering hero by his webbed feet, and by the strange weapon he bears: a gleaming tube launching a fearless variety of insect allies. They shall be named in accordance with the idiom of the day: firebug and lightning bug, and the hero will gather them often in his travels across the land...

## **HOW TO SOOTHE** **AN ITCHY TRIGGER FINGER**

No pearl-handled pistols here, bub. You've got a 1935 vintage Westchester Bug Gun. And it works.

It fires bugs -- Lightning bugs, Basic Bugs, and Fire bugs.

All bugs sleep in blue bug shells. You need those shells -- get 'em at any cost. Each shell has a special marking to show you what kind of bugs are inside. Capture these blue bug shells to keep a good supply of ammo.

...Once in possession of these powerful weapons, the hero will have to learn to switch between them via an arcane command our sayers can interpret only as "By Pressing the L or R Button". Using this command, the bugs can also be used in combination for still more powerful results. Mastering this technique will be critical to the hero's success.

The hero shall also have the ability to climb hanging ropes, chains and vines in order to access remote areas, gather more of the elusive bugs, or thwart earthbound enemies who can only gape at the display of acrobatic finesse...

## COMBINING BUGS FOR MORE FIRE POWER

You can scroll through all the different bugs by pressing R or L on the Control Pad. After you scroll through the individual bugs, a bug combination appears. Use it for an extra blast to your enemy.

### SPECIAL FIREFLY BUG

You may come across a special bug shell that contains a Firefly. The Firefly isn't ammunition, but instead lights the way in dark corridors to let you see where to go. Look for the special platforms that show up by the Firefly's light.

## LOOT

### TROPICAL PUNCH

This ain't no sissy drink. This is life-giving juice. Drink it when you find it to regain lost strength. A glass gives you a boost, the pitcher restores you to full health.

### YIN-YANG COINS

These Yin-Yang Coins were minted in 1100 BC. They were discovered by settlers in a cave on the North side of this island and scattered to the four corners to blanket the island with ninja protection. I picked up some in my travels and discovered a few things. The small ones give you a small power boost, and the gold ones give you a large power boost. If you run out of ninja power, not only are you in trouble, but you have to find more Yin-Yang coins to get the power back.

Once you have ninja power, Maui's ninja meter counts slowly up to 100. You can't run out of power.

### GOLDEN MAUI TOKEN

Find a Golden Maui Token and get a life (oh, if only getting a life was that easy...).

### MOJO DOLL

A Mojo Doll lets you continue playing after Maui uses up all his tries. The key word here is CONTINUE (hint, hint).

### MAGICAL SHRUNKEN HEAD

This Shrunkened Head is a place marker. When you run out of health, you'll restart the level at the last shrunkened head you passed.

### LUAU LOOT

Pick up A LOT of treasure to get to bonus areas (no kidding...), then complete bonus levels to earn special passwords.

### ZOMBIE POWDER BAG

Collect this bag to increase your maximum health potential. Or don't.

## NOTES ON THE ADVENTURE

Here's the skinny. I had stumbled right onto the scene of a crime. And it hurt.

The idol of Shabuhm Shabuhm had been stolen and the islanders were willing to pay big bucks for its return. So I took the job, even though big bucks usually meant big trouble.

You can't prepare yourself for danger -- it comes to you suddenly, like a sneeze. But there are a few things you can do to up your chances of pulling through:

1. Stock up on ammo (bugs).
2. Stay cool with lots of Tropical Punch. If you don't know what I'm talking about, flip to the Loot section and read about it.
3. Don't die.

Oh yeah, the legend of Shabuhm Shabuhm says that if the idol isn't returned within three days, the whole island will go kaboom kaboom. So ya better step on it.

Look kid, I wish you luck. I really do. If you get into any trouble, just whistle. You know how to whistle, don't you? Just put your beak together and blow.

Among the hero's first trials is a battle through a wealthy palace rife with unleashed magic. Here, if the hero steps correctly upon bronze touchstones, the evil magic can actually help him by moving diabolical statues into strategic position...

## 1. CRACKIN' THE GATE OF THE MOJO MANSION

So I walk into the creepiest crib on the island, the Mojo Mansion, and find nothing. Nothing but spiders, an old butler, and enough gold to keep me in down for a decade.

As it turns out, there was more to this dump than meets the eye. I was jumped by a gang of spiders, then I had to swing from chains and walk on ceiling fans to get outta the joint! Do the same and the Big Kahuna In The Sky might let you see tomorrow...

The hero has a secret. His studies of the exotic art of combat have given him the ability to transform to a ninja. This ninja is said to have once possessed a thousand souls... until one was stolen. It is said the ninja is in constant search for this missing soul, but until he finds it, he must gather the ancient yin yang medallions scattered about the island in order to transform.

Few have seen the hero transform into his ninja counterpart. Those who have, describe a tornado of energy triggered by the invoking of the collected yin yang power. Glyphs interpreted by the sayers translate strangely as "Press Y after collecting yin yangs".

## 2. AT THE NINJA TRAINING GROUNDS

All good detectives should be handy with a stick. My ninja finesse makes me just a little handier than most. Knowing my ninja abilities might be the difference between survival and a shady plot at the local cemetery, I unpacked my pajamas and headed for the Ninja Training Grounds.

While I was there I sacked a straw training dummy or two. Then, wouldn't you know it, the first guy I met in the Training Grounds was the local island witch doctor.

He was in a friendly mood, so he only swiped a couple of my remaining souls and used them to create an army of ninja clones for me to battle. I hate that.

Good luck getting through this place -- you're gonna need it.

To learn more about ninja moves, see the *On Becoming a Ninja* section under *Control Yourself, Dollface*.

The ninja is said to have the power to swing from mystical sparkling blocks left throughout the island by our ancestors. Should the ninja staff strike one of these blocks, it will lock into place until the ninja dislodges it in order to proceed.

There have been reports of the ninja's little-known ability to climb shafts of stone by wedging his staff into cracks in the rock. This action has been documented in ancient texts as "Press X while jumping into a shaft".

### 3. MUDDRAKE MAYHEM

MudDrake Shaman

So I met these  
creatures  
called  
MudDrakes.  
Not a kind  
bunch.  
Banished to  
mud flats  
where nobody  
else is  
willing to

live, they have chips on their shoulders  
the size of Morocco. Need a better dental  
plan, too. Keep your eyes peeled for mud  
wasps too. Oh and something about the  
object of the MudDrake's awe...a frog? I  
guess I'll find out soon enough.

Wasp

## 4. SACRIFICE OF MAUI

Sardonic  
bitterness has  
been my only  
friend over  
these last  
years. And as I  
stand here on  
the edge of a  
volcano about to

be tossed in, I just have to laugh at my  
present predicament. Passing the ritual  
of proof has proven me worthy of  
sacrifice. The MudDrakes are determined  
to keep this island from blowin' its lid  
one way or another. As I stand here  
singeing my tail feathers, I think about  
water. This is one duck that misses the  
ocean. But somehow I sense that I'll be  
slurping salt  
water soon.

## 5. TEST OF DUCKHOOD

The MudDrakes have a custom -- their ritual of proof, by which they test the purity of strangers they encounter.

Judging by the looks of those MudDrakes, I'm not going to come out of this with all my feathers intact...

Sure, I make it look easy, but don't try this at home.

## 6. SUNKEN FLYING DUCKMAN

I collect bugs and bogeymen. Not bones. After doing a little interim research, I learned the only way to get the idol back is to take the bones of some ancient native chief named Quackoo from his current resting place, to a burial ground called the Realm of the Dead. One problem: his current resting place is on a boat...at the bottom of the ocean. Just my luck. Apparently he went down with the Flying Duckman years ago and has been pretty unhappy since. Can't say that I blame him. A watery grave is a lousy place to work on your tan.

Moving around can be a little tricky when you're a few fathoms down. Shoot your bug gun to move in the *opposite* direction of firing. This will get you around a little quicker.

## 7. REALM OF THE DEAD

First and last rule of ducktectivehood: Only take chances when you're paid to. I'm told to jump into a particularly smelly opening to get to the Realm. Against my better judgment (but because I'm getting paid several thousand clams) I do. It felt like I was falling forever. Once I made it to the bottom, I placed Quackoo's bones in their rightful place. And he thanked me with a sock in the eye and a right-left combo to my beak. I guess the stress of being dead really got to him.

## 8. MOJO STRONGHOLD

After surviving a ten-foot spider with a bad attitude, a flock of MudDrakes, and Mojo Flame Spirits, I finally made it here and found the missing mojo idol. I hope you do the same. It's not over yet, though.

You'll see...if you get there. So long, pal.

High Mojo Sorceress

MudDrake

## 9. BABALUAU, BABY

Collect enough luau loot and you'll wind up here, the local tourist shindig. Put on a good show and they'll punch your ticket to come back any

time -- just do your best to set off all the fireworks within the time limit and grab any other party favors you can along the way.
